Advancing Hand Hygiene in Healthcare Facilities

In healthcare and high-traffic environments, hand hygiene is more than a protocol — it is a frontline defense. SC Johnson Professional offers two complementary solutions designed to encourage compliance while delivering proven efficacy: the Refresh™ foam soap line and InstantFOAM™ COMPLETE PURE.

Refreshing the Foam Soap Experience

Pure Clean Innovation. From Invention to Perfection.

Revolutionizing something used for decades takes true ingenuity, determination, and vision. The Refresh™ foam soap line by SC Johnson Professional was crafted with input from facility owners, cleaning professionals, fragrance experts and users to deliver a pleasant experience that encourages handwashing.

Effective handwashing can help reduce illness, absenteeism, and associated costs by up to 40% [1]. Each year in the U.S., productivity losses linked to absenteeism cost employers \$225.8 billion [Source: CDC Foundation, 2015]. By making handwashing both enjoyable and efficient, facilities can help support healthier environments.

Mild, Effective & Efficient

Formulated with a milder preservative than MCI/MI, **Refresh™ foam soaps** contain added skin conditioners, making them pleasant on the hands and suitable for all ages. Washing with just one pump removes over 99% of dirt and germs when used properly.

Working with world-class fragrance designers, SC Johnson Professional developed caring, fresh fragrances customers like and remember. With a signature scent at the heart of each fragrance, Refresh™ foam soaps leave hands softly scented with a luxurious feel.

Compared to traditional lotion soap, one pump supports both hygiene goals and cost efficiency:

36%

less product required [2]

45%

less water needed during handwashing [2]

57%

more washes per liter [2]

When soap and water are not readily available, **InstantFOAM™ COMPLETE PURE** delivers The Complete Solution for Hand Sanitizing. A world-first innovation.

InstantFOAM™ COMPLETE PURE is an innovative sanitizing solution for bacteria, fungi, and yeast. Using advanced foaming technology, the unique perfume-free & dye-free alcohol-based liquid is dispensed as a soft-structured foam. Formulated with 80% ethyl alcohol (w/w) for optimal broad-spectrum efficacy, it is designed to be used without water.

The foam leaves hands feeling clean without residue or sticky after-feel, even with frequent use. Unlike liquids, foam does not run off the hands and provides complete control without dripping or splashing. Compared to gels, it contains no gelling agents and leaves no residue on the skin, delivering the **Invisi-Feel® result**. Independent research shows 84% of users prefer foam to gel due to its non-sticky, fast-drying feel.

Proven Efficacy & Responsible Formulation

InstantFOAM™ COMPLETE PURE demonstrates broad-spectrum activity and is proven to eliminate up to 99.9999% of 58 species of bacteria, yeast, and fungi in 15 seconds [3]. It complies with international test standards, including ASTM E2783-11 and EN1500, and has been tested against viruses such as SARS-CoV-2 (COVID-19 Virus), strain: USA-WA1/2020.

Carefully formulated with the user in mind, it is skin hypoallergenic and dermatologist tested to verify very low allergenic potential. The non-drying formula is independently tested and proven to maintain skin moisture, helping keep skin in good condition even in high-frequency usage settings. The product is NSF E-3 Rated for use in and around food processing areas and is compatible with gloves. It is also product certified for reduced environmental impact (UL.COM/EL UL 2783).

Together, **Refresh™ foam soaps** and **InstantFOAM™ COMPLETE PURE** support a comprehensive approach to cleansing and sanitizing, helping healthcare and facility teams reduce risk, encourage compliance, and elevate the hand hygiene experience.

[1] Meta-analysis by B. Michaels Group Inc. of 45 studies conducted in 15 countries between 1998 and 2008. [2] SC Johnson Professional sponsored study: Media4Change, How a Single Change in a Washroom can significantly reduce water consumption and associated costs, 2011. [3] Test Report BSL150826-201: An evaluation of the antimicrobial properties when challenged with 58 micro-organism species using in-vitro time kill ASTM E2783-11 method.
